

## SECTION 22: ERRORS AND EXCEPTIONS HANDLING - 46 minutes, 6 parts

### 1/4 Note about this section

- -> this section is an appendix of the older Python 2 videos
- -> these are included here for reference (it's older course material)
- -> this material is the same as in the previous sections (just an older version of it)
- -> he's suggesting not to re-watch them, because the content is the same
  - -> for the sake of making notes on these
  - -> it's about 16 minutes of video content

## NOTE ABOUT THIS SECTION

The following material is an appendix of the older Python 2 videos. Many students requested that we keep these older videos here for reference.

If you've done the course linearly to this point, then you already know all the material in this section. Feel free to mark these lectures as complete through the curriculum, you do not need to watch them. More info:
